ICON ROCKLEAR IS NOT JUST ANOTHER COATING - IT'S A SYSTEM FOR LIFE

WHAT DOES ICON ROCKLEAR PROTECT FROM?

WHY ICON ROCKLEAR IS THE BEST PROTECTION IN THE WORLD

35X THICKNESS

Icon Rocklear is a highly efficient coating, reaching 2.5 mil (63 microns) in one application – over 35 times thicker than Ceramic or Graphene Coatings. It clear coat removal required by other coatings.

20X UV WEATHERING

Rocklear remains unchanged even after 4,000 hours of intense UV and moisture exposure, offering up to 20 times more UV protection than Ceramic Coatings.

SCRATCH / ABRASION

In a test, a key scratched a panel half-coated with Rocklear. The uncoated part showed a clear scratch, but the scratch was barely visible on the Rocklear-coated area. With other coatings, any scratches require removal, repainting, and re-coating.

SALT SPRAY

Rocklear lasts 300% longer in salty and humid conditions compared to other coatings. It showed no change even after 1,000 hours in tests, while the best professional ceramics lasted only 350 hours.

RENEWABLE

Icon Rocklear's ICE technology enables repairs and reapplications by our technicians, even after severe damage. It's not just a coating; it's a durable, lifelong protection system for your long-lasting, new-looking finish.

30%+ BRILLIANCE

Icon Rocklear stands out with its exceptional shine and clear appearance. In tests, it reflected 97% of light, more than any other coating, even on a five-year-old car paint. It's 30% brighter than any Ceramic or Graphene coating.

Save both time and money with a 48 hour turn around with no vehicle disassembly required.

Along with the superior protection for your exterior paint provided with ICON ROCKLEAR, we also offer protection for these areas as listed below: Windows – provide ease of cleaning, better vision, and superior water repelling during rain. Accessories and Trim provide protection against fading from the sun and road damage deflection. Wheels – 50% less brake dust accumulated, easier to clean, and protection against corrosion. Head Lights and Tail Lights – prevent oxidation and yellowing. Combine the package of your Exterior with these additions and have your vehicle fully protected from environmental damage.
